

Fan Blade Installation

Multi-Fan Motors 10in-20in

1. Slide copper washer onto motor shaft, until it hits the machined stop on the shaft

2. Slide fan blade onto motor shaft, ensuring the flat spot on the blade hub lines up with the flat spot on the motor shaft

3. Tighten the provided 19mm lock nut against the stainless steel washer snapped into the top of the hub

4. Snap the dust cap onto the hub
