

Standard Fan Cover Installation Procedure

Applies to all Better Air Wall Covers (Model shown: LPF-2401)

1. Install fan cover latches, using your preferred screw fasteners. Install latches flush with wall and with appropriate spacing to create a proper seal. Fig 1.
2. Place fan cover over fan and shutter, check the condition of the seal on the edge of the cover and install it by twisting the latches over the cover to create a tight seal. Fig 2.

Note: There is no need to remove the fan shutter before installing a Better Air Fan Cover.
